

USER GUIDE
**How To Deposit Digital
Assets To AscendEX (PC)**

How to fund your account on AscendEX (standard crypto-deposit)?

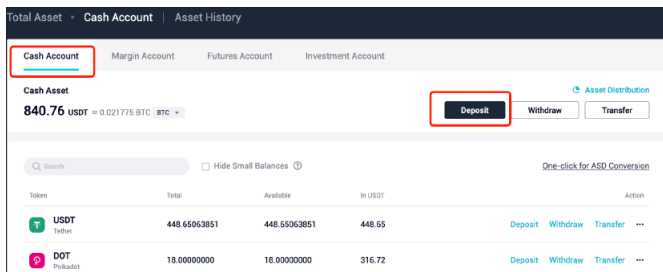

HOW TO DEPOSIT DIGITAL ASSETS TO ASCENDEX (PC)

You can deposit digital assets from external platforms or wallets to AscendEX via a deposit address on the platform. To find the address:

1. Visit the AscendEX official website.

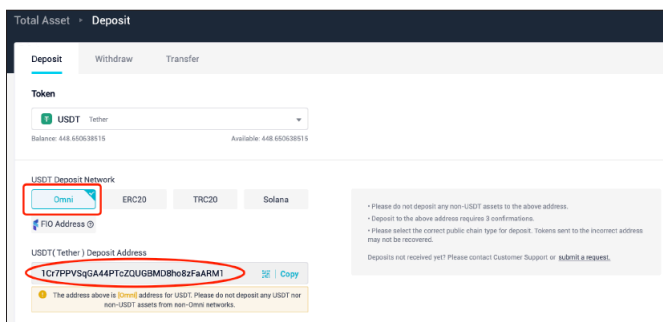

2. Click on [Total Asset] - [Cash Account]

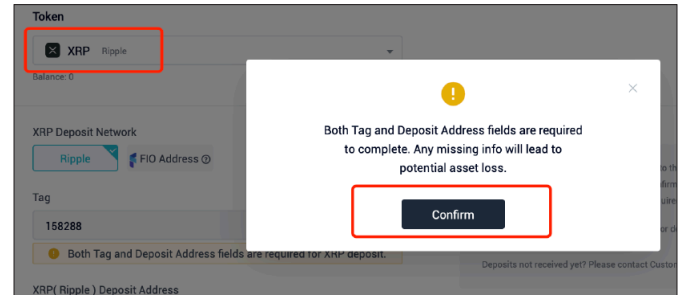

3. Click on [Deposit], and select the token you want to deposit. Take USDT as an example:

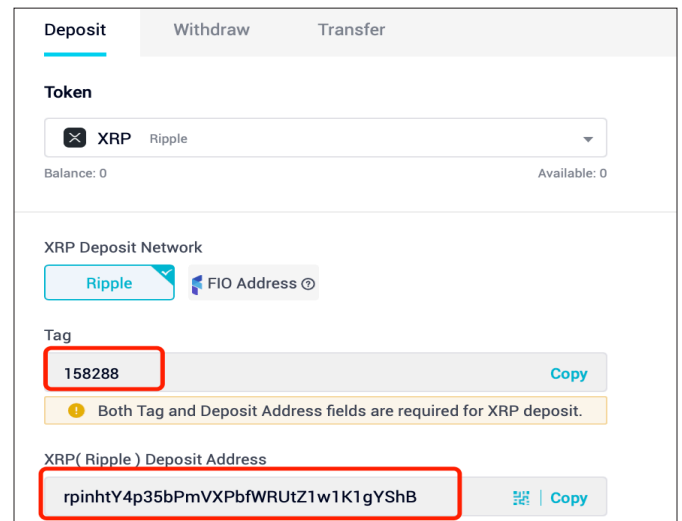

- A. Select USDT
- B. Select Public Chain Type (fees are different for different chain type)
- C. Click [Copy] to copy the deposit address and paste it into the withdrawal address field on the external platform or wallet. You can also scan the QR Code to deposit

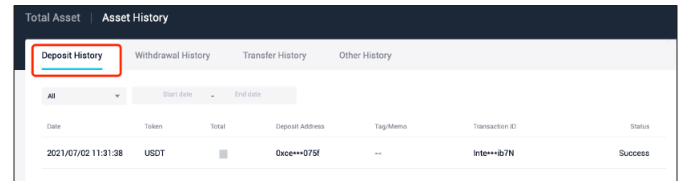

4. For some tokens, a Tag is required to make a deposit. In this case, please enter both Tag and Deposit Address when you deposit. Any missing info will lead to potential asset loss. Take a deposit of XRP for example. Select XRP, click on [Confirm] to proceed.

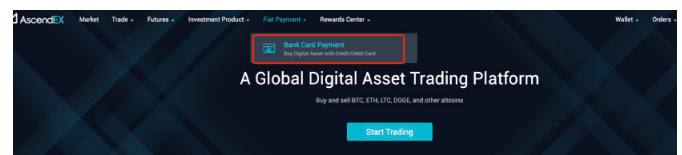

5. Copy both the Tag and Deposit Address and paste them into the withdrawal address field on the external platform or wallet.

6. Check the deposit status under [Deposit History].

7. If you currently do not hold any digital assets, please visit ascendex.com on your PC - [Fiat Payment] to purchase and start trading.

For further details, please refer to the next section of this guide to Implement Credit/Debit Card Payment Solution.
